ESTABLISHED 1866.

SOMERVILLE, TENNESSEE, FRIDAY, APRIL 9, 1920.

NEW SERIES: VOL. XIII.—NO. 42

## Garden Notes

The cold of the first of this week was a severe blow to gardening in this section, the thermometer registering as low as 28 Sunday night with plenty of ice every where. Due to the late planting of gardens there were few tender vegetables up and the damage done was not heavy. We missed the loss of tomato plants by the narrowest, as we expected to get them transplanted last week, but did not. The plants are ready and will go into the garden with the first warm weather.

The shucks on the young peaches are just about ready to drop off and it is time for spraying them with Bordeaux mixture and arsenate of lead to kill the worm and prevent the brown rot which destroys so many peaches in this country about the time they begin to ripen.

Plenty of time yet to bed sweet potatoes and that is by far the best way to supply one's self with plants that will live and make potatoes.

Many people in this section who ordered the frost proof cabbage plants about the first of February are still looking for their orders to be filled. The growers in Georgia, Florida or Alabama has the money and the gardener who ordered has nothing and no prospects of getting plants. These growers are an untrustworthy bunch and that is why we quit handling their plants.

Several are asking about the time for setting the first sweet potatoes. It is entirely too early yet for such work. We would not transplant a one till May and the middle to the last of that month is better than the first half of the month. There is ample time yet to bed for potatoes and grow the plants.

Plant a succession of the early vegetables. The first planting of peas large enough to stick, plant another planting to come in when the first are gone. And so with all the early vegetables.

## How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Medicine. Hall's Catarrh Medicine has been taken by catarrh sufferers for the past thirty-five years, and has become known as the most reliable remedy for Catarrh. Hall's Catarrh Medicine acts thru the Blood on the mucous surfaces, expelling the Poison from the Blood and healing the diseased portions. After you have taken Hall's Catarrh Medicine for a short time you will see a great improvement in your general health. Start taking Hall's Catarrh Medicine at once and get rid of catarrh. Send for testimonials, free. F. J. CHENEY & CO., Toledo, Ohio. Sold by all Druggists, Etc.

A valuable dressing for flesh wounds, burns, scalds, old sores, rash, chafed skin is BALLARDS SNOW LINIMENT; is both healing and antiseptic. Sold by Price Drug Co.

## Feeling For Better Sires Grows

Reports from county agricultural agents and specialists of the Division of Extension, University of Tennessee, show that the farmers and livestock breeders throughout the State, are lining up behind the movement for better sires of all kinds.

Active crusades are now in progress or are being planned for the near future in many counties. In April active campaigns will be conducted in four counties, Weakley, Humphreys, Henry and Haywood. A survey will be made of each district and community in the counties, the owners of scrub sires as well as purebreds will be listed. As a result of the sire campaign in Blount County, fifteen out of twenty Aberdeen-Angus bulls offered at two sales which were recently held in that county, were purchased by farmers of the county to head grade herds. The Holstein breeders of the county formed an association in March and they have lined up with the Angus and Poland China associations for better sires and the recent livestock sales in the county displayed some very fine team work on the part of the three associations. This only serves as an example of what farmers in a county can accomplish when they get behind a movement. Already hundreds of farmers over the State have pledged themselves to use only purebred sires. It is expected that within the next few months several hundred head of purebred sires and also female stock, will take the place of scrubs on Tennessee farms.

SURGEONS agree that in cases of Cuts, Burns, Bruises, and Wounds, the FIRST TREATMENT is most important. When an EFFICIENT antiseptic is applied promptly, there is no danger of infection and the wound begins to heal at once. For use on man or beast, BOROZONE is the IDEAL ANTISEPTIC and HEALING AGENT. Buy it now and be ready for an emergency. Sold by Price Drug Co.

## Registration of Voters

By virtue of the authority vested in us as the Board of Elections and Registration for Fayette county, State of Tennessee, we hereby order that the Registration Books be kept open for the registration of voters in Somerville, said county and state, on April 9, 10 and 12, 1920, precedent to the municipal election for the town of Somerville which will be held on May 12, 1920, for the purpose of electing a mayor, a recorder and six aldermen for said town for the ensuing two year term. And for the purpose of holding said registration of voters Miss Lucy Murrell and Miss Bell Reeves are hereby appointed Registrars.

F. B. MOORMAN, Chairman  
W. T. LOGGINS, Secretary  
W. S. Latta, Commissioners

This March 30, 1920

## County Court In Quarterly Session

The County Court of Fayette County met in quarterly session at the court house last Tuesday morning with thirty one Justices present, Hon. W. G. Shelton, Chairman, read this usual financial statement, showing the county's expenses and income and the condition of the several funds in the Trustee's hands. This report shows a growing indebtedness against the county, and this condition is not to be wondered at when it is remembered that about the same work must be done for the county roads, bridges, etc., every year and these items now cost double their former price, just as does every thing else. This increase in the expenses of the county has not been met by the increase in revenues and the county's finances have grown annually a little less easy.

To meet the needs of the county for the coming year until taxes again are paid, the court passed a resolution authorizing the Chairman if he found it necessary, to issue short term notes to the amount of \$5,000 and to borrow from the banks \$10,000 or such part thereof as was found to be necessary. This same resolution was adopted last year but Chairman Shelton managed so that he did not borrow at all on it. Discussion of the wheel tax and its collection and non-collection in parts of the county took some time and the court passed a resolution in which the attention of every constable is called to the fact that it is his duty to see that the law is observed in his district and that such owners of vehicles as do not pay the wheel tax should be brought by him before the district magistrate to be bound over to the circuit court. The fund arising from this law is used for road purposes in the district where collected.

The appropriations made by the court for road and levee work totaled a larger sum than has been done for several years past, while a number of requests for appropriations were referred to Highway Commission for attention.

The following were appointed members of the County Equalization Board: Dr. J. E. Parks, W. H. Chambers, J. R. Freeland, W. R. Seay, T. A. Crawford.

## IS THIS YOUR EXPERIENCE

### Many Somerville People Are Afflicted With Annoying Kidney Ills

Are you bothered with too frequent action of the kidneys? Are the secretions highly colored—do they contain sediment—burn and scald in voiding? These are all signs of kidney sickness and should not be neglected. Somerville people recommend Doan's Kidney Pills. If your back aches and your kidneys are weak you will find no better recommended remedy.

C. P. McDowell, farmer N. Covington St., Somerville, says: "Doan's Kidney Pills are an excellent kidney remedy and I gladly recommend them, to anyone suffering from kidney trouble. My kidneys were weak, and I had to get up often at night to pass the secretions, which were highly colored. I had bad spells with my back and it also kept me awake at night, owing to the dull pains. I saw Doan's Kidney Pills advertised by people who had been benefited by them, and I decided to get a box at the Price Drug Co. I used Doan's as directed, and they cured me of the trouble. Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. McDowell had. Forster Milburn Co. Mfrs., Buffalo, N. Y.

## How Diphtheria is Contracted

One often hears the expression, "My child caught a severe cold which developed into diphtheria," when the truth was that the cold had simply left the little one particularly susceptible to the wandering diphtheria germ. If your child has a cold when diphtheria is prevalent you should take him out of school and keep him off the street until fully recovered, as there is a hundred times more danger of his taking diphtheria when he has a cold. When Chamberlain's Cough Remedy is given it quickly cures the cold and lessens the danger of diphtheria or any other germ disease being contracted.

## Feeding and Management of Hogs In April

Tennessee is now one of the largest hog producing states of the south. In fact it ranks along with some of the big cornbelt states. The livestock specialist of the Division of Extension, University of Tennessee, has outlined a plan for the management and feeding of hogs for each month in the year and for April some good pointers are given. The first is the question of forage crops. For March it was suggested that crimson, red or white clover, rye, barley, blue grass or orchard grass could be pastured. In April this can be continued with the addition of alfalfa which was sown previous to August of last year. Ten to fifteen hogs per acre may be grazed on alfalfa for seven months. Eight to twelve head per acre may be allowed to run on red clover pasture.

The next question is feeding. Fattening hogs should be finished for market this month. Protein feeds are not so essential during the last month of the feeding period, so it may be reduced. Feed enough to keep the hogs gaining about one-half pound a day. They should have plenty of fresh water and minerals at all times.

Young pigs should be fed well as it never pays to stunt them. In management of the herd attention should be given to the fact that all spring pigs should be castrated at the age of four to six weeks. Brood sows should be fed so as to gain a little while suckling the litter. To kill worms give: five grains of calomel, five grains of san-tonin to each pig weighing 30 to 75 pounds this should be given in slop or bran mash after starving pig 24 hours. A physic should be given after 24 hours.

Careful attention should be given sows and gilts bred to farrow in March. Have them tame and gentle so that assistance can be easily given at farrowing time.

The best time to market late summer and fall pigs is from March 15 to April 20. April 20 to June 15 is a fairly good time to market. The heavy hogs on the market is about over, and the market is due to advance this month according to market specialists.

Many farmers are finding that it is a great saving to ship co-operatively to large markets.

## Are You Happy?

To be happy you must be well. If you are frequently troubled with constipation and indigestion you cannot be altogether happy. Take Chamberlain's Tablets to correct these disorders. They are prompt and effectual, easy to take.

## Fertilizers For Your Garden

Manure is scarce in and around cities. Commercial fertilizers must be depended upon primarily for adding fertility to garden soils. It pays to use the best grade of commercial fertilizers. When the home gardener buys fertilizers he pays for nitrogen, phosphoric acid and potash, and if he can secure the required amount of these elements in a small quantity of material, so much the better, as he will avoid the handling of a greater weight upon which freight and other costs have been paid. A fertilizer containing from 4 to 6 per cent of nitrogen, 8 to 10 per cent available phosphoric acid, and 3 or 4 cent potash is generally recommended for use on home gardens, by specialists.

One pound to 30 feet of row is equivalent to an application of 500 pounds to the acre. One pound to 15 feet of row is equivalent to an application of 1000 pounds to the acre, and an application of 1 pound to 8 feet of row is practically equivalent to 2000 pounds of fertilizer to the acre.

Commercial fertilizers are high at present and no more than is absolutely necessary should be used. Care must also be taken in their application, as there is constant danger of burning the roots of the plants, especially where the fertilizers are applied directly in the rows. The best results are generally secured where the fertilizers are applied and raked in a few days before sowing the seeds or setting the plants. In this way they become more or less mixed with the soil and there will be little danger of doing the plants an injury.

Habitual Constipation Cured in 14 to 21 Days  
"LAX-FOS WITH PEPSIN" is a specially-prepared Syrup Tonic-Laxative for Habitual Constipation. It relieves promptly but should be taken regularly for 14 to 21 days to induce regular action. It Stimulates and Regulates. Very Pleasant to Take. 60c per bottle.

## Notice To Contractors

Notice is hereby given that the following work of construction for Beaverdam Creek Drainage District No. 1, of Fayette, Shelby and Tipton Counties, Tennessee, will be let at the court house in Somerville, Tennessee, on the 26th day of April 1920 at noon, and sealed bids on the work will be received until said hour on said date.

First: Cleaning and clearing off the right of way for the canal and laterals according to the plans, specifications, orders and decrees of the court. The clearing for the main canal must be 120 feet wide, and the clearing for all laterals must be 100 feet wide. The rights of way must be cleared to the outside of same.

Second: The excavation, digging and construction work necessary to dig, construct and turn over complete, according to plans specifications and blue prints and profiles and decree of the court. The estimated yardage for the main canal and laterals aggregate 630,000 cubic yards however, the contractor must handle all additional yardage, if any, and do all necessary work to complete the district according to the plans and specifications and decrees of the court. The contractor will be required to leave openings in the spoil banks of the width and at the places designated by the board of directors, or engineer in charge to facilitate draining into the canal, and also to widen and deepen and clean out the mouth of any creek, or branch, or slough or inlet emptying into said canal or laterals.

Third: The term or distance between the edge of the canal and the foot of the spoil bank when settled must not be less than 10 feet.

Fourth: Each bid on the work must be accompanied by a certified check for the sum of ten per centum of the amount of the bid, payable to the Drainage District. The check will be returned to the bidder if the bid is rejected, or if bid is accepted the check will be returned when the contract is executed. A bond in the sum of 25 per centum of the bid will be required to guarantee a faithful performance of the contract.

Fifth: The work must begin as soon after the contract is executed as possible and be completed by the 1st day of September 1921.

The undersigned Directors reserve the right to reject any and all bids and re-advertise.

For any further information write to Bond & Bond Attorneys, Brownsville, Tennessee, or to W. M. Mayo, Attorney Somerville, Tennessee.

This the 30th day of March 1920.  
W. G. Shelton  
J. A. PHILLIPS  
F. E. Adams

Board of directors of Beaverdam Creek Drainage District No. 1, of Fayette, Shelby and Tipton Counties, Tennessee.

## No Worms in a Healthy Child

All children troubled with worms have an unhealthy complexion, which indicates poor blood, and as a result there is more or less stomach disturbance. GROVES TASTELESS CHILD TONIC given regularly for two or three weeks will enrich the blood, improve the digestion, and act as a General Strengthening Tonic to the whole system. Nature will then grow off or dispel the worms, and the Child will be in perfect health. Pleasant to take. 60c per bottle.

## AUTO MOVIES By W.H. HUGHES

A FOOLISH little nut that didn't know enough to stay in place may cause you a serious accident some day. The wise thing to do is to have us carefully examine your car from time to time and avoid trouble. We know where to look.

## The City Election

The following have been selected by a meeting of the younger men of Somerville as their nominees for municipal offices in the coming election on May 12: For Mayor Dr. Jno. W. Morris, for Recorder Capt. James D. Rhea, and for Aldermen C. A. Oliver, C. R. Wirwa and J. W. Morrison of the present Board, and J. B. Summers, J. L. Sanders and Dr. J. K. Crawford as new members.

So far as The Falcon learns no steps have been taken by any other element of Somerville voters and it cannot be even predicted what other candidates, if any, may be placed in the field. It is generally understood that the present Mayor, Hon. C. W. Crawford, refuses to stand for re-election but The Falcon is not authorized to state this except as a rumor.

The list of candidates named above was handed The Falcon by one of the young men taking part in the caucus nominating the candidates and is counted as authentic. Candidates have until May 2 to file their names with the County Election Commissioners and until that time it would not be easy to predict what candidates may be in the field.

## WHY HAVE "SPRING FEVER"

Why Worry, Fret and Get Nothing Done, Just Because Your Blood is Sluggish

## YOUR BLOOD NEEDS STRENGTHENING

People Nowadays Take That Wonderfully Effective Blood Tonic, Pepto-Mangan. Your Druggist Has It

Really, isn't it foolish to be handicapped for weeks in the spring, just because your blood is sluggish?

The glorious spring days! You ought enjoy them instead of feeling unhappy and half asleep—just too tired out for anything. You ought to be finding new vigor for your work in the spring air—'pep'—'enthusiasm'—happiness!

But you can't, because your blood is clogged with poisons. For long months it has had too little fresh air and has fought off many germs. And it now has heat-making properties that are not needed in warm weather.

Don't work under a handicap, when it isn't necessary at all. Clear up your sluggish blood. Give it help. Get some of that famous blood purifier and tonic, Pepto-Mangan.

Pepto-Mangan is used by physicians everywhere. You can buy it at any drug store in either liquid or tablet form just as you prefer. There's no difference in medicinal value.

Make certain that you get the genuine Pepto-Mangan. Ask for "Gude's" "Pepto-Mangan," and see that the name "Gude's" is on the package. adv.

## Club Subscription Offers

So many requests come to The Falcon for club subscription offers that we print here a few of the ones most asked for, with the subscription price of the two papers and the price we make.

		Both For
Daily Commercial Appeal	\$6.00	
The Falcon	2.00	\$7.00
Daily and Sunday Commercial Appeal	\$8.00	
The Falcon	2.00	\$8.50
News Scimitar	\$5.00	
The Falcon	2.00	\$5.75
Progressive Farmer	\$1.00	
The Falcon	2.00	\$2.65

We also have clubbing rates with Southern Agriculturist, Southern Ruralist, and other farm papers, poultry papers, fashion papers, and on many of the leading newspapers and magazines of the country. Many subscribers make up their list and save enough to pay for The Falcon several times over in the year's reading. We can save the full price of The Falcon to any subscriber who takes as many as one daily paper and three others, any kind. Try Us.
